

Clutch / Clutch Buttons / Friction Liners

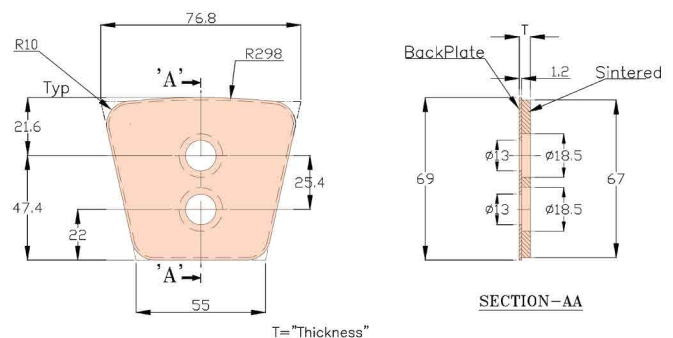

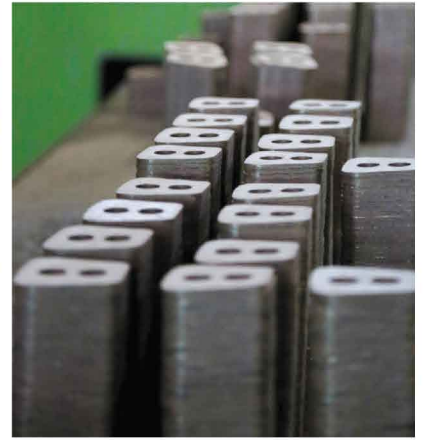

Kateel has been a leader in Development and Manufacturing of High-Performance, Heavy-duty Friction Materials for Clutch, Brake, Transmission and Industrial Motion Control Systems for more than 3 decades. Our products find their application in Heavy Commercial Vehicles, Tractors, Industrial Machines, Dump trucks, Backhoe loaders, Material Handling vehicles, Railways etc. Kateel also offers products for Thermal Management components and High temperature friction parts.

Friction materials form a key performance element in the clutches and brakes of vehicles and in industrial applications. They make an important contribution in boosting efficiency of the system. Our use of high-quality materials and innovative processes ensures that the product we deliver have excellent co-efficient of friction and high wear-resistance at temperatures ranging between 400° C upto 1000° C

CLUTCH BUTTON

Sl No	T	Model
01	4.6-4.8	CL-B-03
02	5.6-5.8	CL-B-04

Kateel offers Friction Materials in both Organic and Sintered options. We offer a range of Friction Materials for both wet and dry applications. All Friction Material products are manufactured in-house using state of the art machineries and high-quality friction materials. At Kateel, we also have a state of the art testing facility to simulate customer test requirements.

Application areas:

- Trucks / Buses
- Tractors
- Wind power plants
- Motorsports and Motorcycles
- Industrial applications - cranes and conveyors

FRICTION COMPONENTS

- Clutch Facings
- Clutch Discs
- Clutch Buttons
- Wet Brake Discs
- Disc Brake Pads
- Disc Brake Rotors
- Drum Brake Pads
- Steel Discs

SINTERED BRAKE LINERS
